

# Aluminum CT

Tecnocap, formerly Penn-Wheeling Closure, takes its experience in the steel closure business, and also offers aluminum continuous thread closures (CT's). Aluminum CT's offer an attractive high-end look and appeal to the consumers of cosmetic, beverage, nutraceutical and aromatherapy products.

Aluminum offers a premium package appearance to any product. Aluminum's anti-corrosion properties protect your product in a moisture-laden environment. Aluminum does not rust therefore protecting the integrity and image of your product.

"Say Something" about your product by designing the look of an aluminum closure to fit your packaging needs. All Aluminum CT's can be customized with your design or company logo through lithography, coating colors, and embossing methods. All lithography is produced in our own facility, reducing cost and decreasing delivery time.

Tecnocap is the third largest manufacturer of Lugs/Twists in the world and a leading manufacturer of customized and stock steel and aluminum closures. Our product line includes: Continuous thread (CT's) closures, Aluminum CT's, smooth wall CT's (Unishells), Child Resistant Closures (Pharma-CRC® and SAF-LOK® CRC's), Lugs, VIN-GUARD®, capPlugs, and custom closures, as well as capping machines and accessories. Closures are available in a range of sizes, colors, and finishes, along with various liners including heat induction, plastisol, and safety seals.

Tecnocap provides expert engineering assistance for new product development.

Contact Tecnocap for all your metal closure needs.
